

Data Sheet for Shielding Moves and Upgrades

Global EMC have the ability to modify and migrate shielded chambers.

Our capabilities mean that we can address any shielded chamber modification with full health & safety compliance..

Global EMC have the ability to:

1. Expand shielded chambers
2. Modify and make smaller
3. Work with all shielding types
4. Re-gasket the PAN system shield
5. Add facilities (doors, filters vents etc)
6. Improve shielding performance
7. Improve anechoic performance (see anechoic upgrades)
8. Add support structures (to prevent deflection from loads)
9. Add control rooms and amplifier rooms
